

# ODMOTALICA LIMA

## ODMOTALICA LIMA

### ELEKTRIČNA KONZOLNA ODMOTALICA LIMA

Tehnički opis:

- izvedba: konzolna - max nosivost 15.000 kg
- max radna širina 1550 mm
- odmotavanje lima vrši se uz pomoć elektromotora sa reduk torom po sistemu kreni – stani
- nabacivanje rolne na trn odmotalice vrši se pomoću viljuškara ili pomocu hidraulicnog nosaca rolne koji je pokretan
- vreme postavljanja rolne na trn odmotalice pomoću hidraulicnog nosača iznosi 10 min.

## ODMOTALICA LIMA

Tehnički opis:

- nosivost do 10 t,
- max radna sirina 1550mm
- odmotavanje lima reguliše se frikcionom kočnicom na samoj mašini,
- nabacivanje rolne na trn odmotalice vrši se pomoću viljuškara.

## SHEET METAL DECOILER

### SHEET METAL DECOILER WITH ELECTRICAL PANEL

Technical description:

- Performance: panel-maximum capacity is 15,000 kg
- Maximum working width is 1,550 mm
- Sheet decoiling is done with the help of electric motor reducer according to the system go-stop
- The putting of roll on the core shaft of decoiler is done with a forklift truck or with hydraulic reel carrier which is moveable
- The time needed for putting the roll on the core shaft of decoiler with hydraulic carrier is 10 minutes

## SHEET METAL DECOILER

Technical description:

- Carrying capacity up to 10 tons
- Maximum working width 1,550 mm
- Sheet unwinding is regulated by friction brake on the machine
- The putting of the roll on the core shaft of decoiler is done with a forklift truck
